WHITE PAPER

A Decentralized Franchise Network
Rewarding A Globally Unified Community

Disclaimer

This document is a technical white paper (the “White Paper”) and is being furnished by RL Corporation LTD (the “Company”) for information purposes only. The communication of this White Paper is restricted by law. It is not intended for distribution to, or use by any person in, any jurisdiction where such distribution or use would be contrary to local law or regulation. This White Paper sets out the current and future developments of a blockchain enabled franchise business model. This White Paper is for information purposes only and is not a statement of future intent. Unless expressly specified otherwise, the products and innovations set out in this White Paper are currently under development and are not currently in deployment. The Company and the Company makes no warranties or representations as to the successful development or implementation of such technologies and innovations, or achievement of any other activities noted in the White Paper, and disclaims any warranties implied by law or otherwise, to the extent permitted by law. No person is entitled to rely on the contents of this White Paper or any inferences drawn from it, including in relation to any interactions with the Author or the technologies mentioned in this White Paper. The Company disclaims all liability for any loss or damage of whatsoever kind (whether foreseeable or not) which may arise from any person acting on any information and opinions relating to the Company, its website or the contents contained in this White Paper or any information which is made available in connection with any further enquiries, notwithstanding any negligence, default or lack of care. The information contained in this White Paper is derived from data obtained from sources believed by the Company to be reliable and is given in good faith, but no warranties or guarantees, representations are made by the Company with regard to the accuracy, completeness or suitability of the information presented. It should not be relied upon, and shall not confer rights or remedies upon, you or any of your employees, creditors, holders of securities or other equity holders or any other person. Any opinions expressed reflect the current judgment of the authors of this White Paper and do not necessarily represent the opinion of the Company. The opinions reflected herein may change without notice and the opinions do not necessarily correspond to the opinions of the Company. The Company does not have an obligation to amend, modify or update this paper or to otherwise notify a reader or recipient thereof in the event that any matter stated herein, or any opinion, projection, forecast or estimate set forth herein, changes or subsequently becomes inaccurate. The Company, its directors, employees, contractors and representatives do not have any responsibility or liability to any person or recipient (whether by reason of negligence, negligent misstatement or otherwise)

arising from any statement, opinion or information, expressed or implied, arising out of, contained in or derived from or omission from this White Paper. Neither the Company nor its advisors have independently verified any of the information, including the forecasts, prospects and projections contained in this White Paper. Each recipient is to rely solely on its own knowledge, investigation, judgment and assessment of the matters which are the subject of this report and any information which is made available in connection with any further enquiries and to satisfy itself as to the accuracy and completeness of such matters. Whilst every effort is made to ensure that statements of facts made in this White Paper are accurate, all estimates, projections, forecasts, prospects, expressions of opinion and other subjective judgments contained in this White Paper are based on assumptions considered to be reasonable as of the date of the document in which they are contained and must not be construed as a representation that the matters referred to therein will occur. Any plans, projections or forecasts mentioned in this paper may not be achieved due to multiple risk factors including without limitation defects in technology developments, legal or regulatory exposure, market volatility, sector volatility, corporate actions, or the unavailability of complete and accurate information. The Company may provide hyperlinks to websites of entities mentioned in this White Paper, however the inclusion of a link does not imply that the Company endorses, recommends or approves any material on the linked page or accessible from it. Such linked websites are accessed entirely at your own risk. The Company does not accept responsibility whatsoever for any such material, nor for consequences of its use. This White Paper is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation. This White Paper is only available to persons subscribing and opting-in on www.reflexiontoken.io and may not be redistributed, reproduced or passed on to any other person or published, in part or in whole, for any purpose, without the prior, written consent of the Company. The manner of distributing this White Paper may be restricted by law or regulation in certain countries. Persons into whose possession this White Paper may come are required to inform themselves about and to observe such restrictions. By accessing this White Paper, a recipient hereof agrees to be bound by the foregoing limitations. Planned features may change based on the competitive landscape and go-to-market strategy. The section «Risk Statement» details some of the potential risks that you should consider. We strongly recommend you to seek out independent financial and legal advice before engaging in any sort of business endeavors.

Risk Statement

No regulatory authority has examined or approved any of the information set out in this White Paper. The publication, distribution or dissemination of this White Paper does not imply that the applicable laws of any jurisdiction, regulatory requirements, or rules have been complied. To the maximum extent permitted by the applicable laws, regulations and rules, the Company and its affiliates and respective officers, employees or agents, in relation to the website (<https://reflexiontoken.io>), products and services will not be liable for any damages of any kind, including, but not limited to, direct, consequential, incidental, special or indirect damages (including but not limited to lost profits, loss of revenue or third party loss whether foreseeable or otherwise, trading losses or damages that result from use or loss of use of the website, its products and services). For the avoidance of doubt, the Company expressly disclaims any and all responsibility for any direct or consequential loss or damage of any kind whatsoever arising directly or indirectly from: (i) reliance on any information contained in this White Paper, (ii) any error, omission or inaccuracy in any such information, (iii) any action resulting therefrom, or (iv) usage or acquisition of products and services available on the website and other electronic platforms.

You confirm and agree that you are not purchasing any of the products and services for purposes of investment, speculation for immediate resale or other financial purposes. Some of the statements in this White Paper include forward-looking statements which reflect the Company's current views with respect to execution of the expected roadmap, financial performance, business strategy and future plans, both with respect to the Company and the sectors and industries where the Company intends to operate. Statements which include the words "expects", «plans», «believes», «projects», «anticipates», «will», «aims», «may», «would», «could», «continue» and similar statements are of a future or forward-looking nature. All forward-looking statements concern the matters that involve risks and uncertainties. Accordingly, there are or will be important factors that could cause the Company's actual results to differ significantly from those indicated in these statements. These factors include but are not limited to those described in Terms & Conditions and Token Purchase Agreement which should be read before purchasing any XRLO Tokens or any of the Company's offerings.

Reflexion is aiming to **transform** the **traditional franchising system into a trusted network of communities** that partake in a global chain of lounges that **serve as a gathering point** for open-minded and cause-driven individuals from **VIPs, celebrities, athletes.**

Abstract

This paper explains all you need to know about how Reflexion Lounge (the “Company”); the first luxury glass-fronted waterside lounge in Britain plans to utilize a digital utility token for the payment of goods and services. The Company’s business is active in the restaurant and lounge industry and has been in operation in the United Kingdom (UK) for more than four years. The Company continues to provide excellent services to an ever-growing clientele from different parts of the world. Reflexion Lounge is a private limited liability company that is dully registered in the UK. As of the time of writing this paper, Reflexion Lounge is the only business on the Erie Basin Waterfront and also the only “Shisha Lounge business” certified by Meduse in the United Kingdom.

We also have our own “RL” branded Meduse Menu specifically for our teeming customers. At Reflexion Lounge the customers are provided with a comfortable ambiance and a soothing environment for comfort and relaxation. Reflexion Lounge managed to build a vibrant community that is loyal to the RL brand. The community includes celebrities, athletes, high net worth individuals and people from all walks of life. The trust aspect of our business has brought us to realize the need to globalize our presence and spread-out our cause for unity and self- reflection. We decided to take this initiative through

an innovative growth strategy by establishing a community outreach program that will unite the people from all around the world for the very cause of unity and self-reflection. We also realized that there is a need for an economic transformation, to provide the comfortable means of survival, and Reflexion does this by transforming the traditional franchising system into a trusted network of community members that partake in a global chain of lounges that serve as a gathering point for open-minded and cause-driven individuals from VIPs, celebrities, athletes and the local communities.

As trust and connectivity are on at the core of our values, we aim to provide transparency within the community for the exchange of value (i.e. data, goods, services, money, etc...). The Company's community growth plan allows our team to take a serious consideration to adopt blockchain and cryptocurrency as a business-model enabler.

In recent years, blockchain has been constructively impacting the way and the manner in which businesses are run and executed around the globe for better profitability. We, at Reflexion Lounge are not left out in this movement as well. The management of Reflexion Lounge is currently working on the use of utility token for community exchange, for buying RL good and services and more...

With this utility token, Reflexion Lounge will be expanding into e-Commerce which includes branded products and accessories, leisure and entertainment, events and catering as well as franchising of the Reflexion Lounge as part of the community outreach. The utility token affords a contributor the opportunity to participate into any of our franchises around the globe. With the current expansion plan taking place at Reflexion Lounge, potential token buyers stand the chance of earning from our franchise royalties in the form of cryptocurrency. Token holders won't have to worry about the uncertainties that have surrounded the cryptocurrency market over the years. This is because the utility token that will be introduced by Reflexion Lounge will not be dependent on the gains or losses of the digital currencies like Bitcoin; rather it is the strength of our brand and the progress of the community's growth along with the trusted goodwill of the Reflexion Lounge as a business establishment and a global community.

This paper provides a detailed approach on how the use of a utility token by Reflexion Lounge will also show incredible profit potential that this expansion plan holds for the business and its community. We believe there is an obvious growth potential lying ahead of this great innovative approach.

Introduction

Reflexion lounge is a restaurant and lounge business establishment that provides customers with a beautiful treat and an inclusive experience. We bring the essence of unity in community. It is a waterfront café, restaurant and water- pipe lounge with a luxury glass-fronted waterside view.

The societal shift from alcoholic drinks to a more mindful and sober lifestyle has dramatically impacted and helped in the success of our business. Through its recent Community Outreach Program, Reflexion Lounge is preparing to become a leading brand in the restaurant and lounge market around the world. This paper explains and informs you about the plans and goals of the management of Reflexion Lounge and how we intend to take over the more significant percentage of customers in the restaurant and lounge business. This is not just in the United Kingdom but across the globe. At the moment, Reflexion Lounge gets customers flying from the Qatar, UAE, Kuwait, and Australia to enjoy this fantastic service. The statement as mentioned earlier reiterates the fact that the customer base of Reflexion Lounge is growing exponentially. With the expansion plan currently taking place at Reflexion Lounge, there is no doubt that the business is geared for greatness and success. At Reflexion Lounge, we believe that most successful and prestigious restaurants and lounges around the world attained such stature as a result of their quality and affectionate service delivery. It is for this reason that Reflexion Lounge management team is very critical about their service delivery to customers.

Reflexion Lounge is currently serving over 15 nationalities, and a broad clientele base. Hence, our mission is limitless. The management is fast strategizing to develop more outlets, avenues and branches to ensure that Reflexion Lounge is a global brand.

trained 
certified 
authorized 
by Meduse
in the UK

Reflexion Lounge Overview

Reflexion Lounge is the only Shisha Lounge business that is trained, certified, and authorized by Meduse in the UK. We are official distributors of their Meduse Smoking Cocktails and also have our own Reflexion Lounge Meduse Menu. To understand the prestigiousness of the Meduse services, some of the business establishments with this admired product include;

- Amber Lounge - Monaco
- Sea Lounge - Monte Carlo
- Ritz Carlton - Bahrain
- Four Season - Dubai
- W Hotels - Bali

Reflexion Lounge also gives customers a fantastic treat on their weddings by surprising their guests with Meduse Shishas. At the moment, we have had over 150 birthdays at Reflexion Lounge, and we provide full bespoke service as well. There is also an online delivery system that delivers waterpipe within a 6-mile radius. This is the only Lounge that has this type of service in the United Kingdom at the moment.

The team behind Reflexion Lounge **believe and operate** with the mentality that “**your location will greatly determine your class of clientele**” especially in the restaurant and lounge business.

Profile and Mission Statement

The team behind Reflexion Lounge believe and operate with the mentality that “your location will greatly determine your class of clientele” especially in the restaurant and lounge business. Therefore, we plan to pin our physical and digital presence in the right places to support the Community Outreach Program and a successful franchise network expansion.

The mission of Reflexion Lounge is to bring forth a community outreach program and a blockchain-enabled franchise network allowing our team to create a unified network of serviced by autonomous agents for a modern virtual global utopian-like society.

Reflexion Lounge Business Model

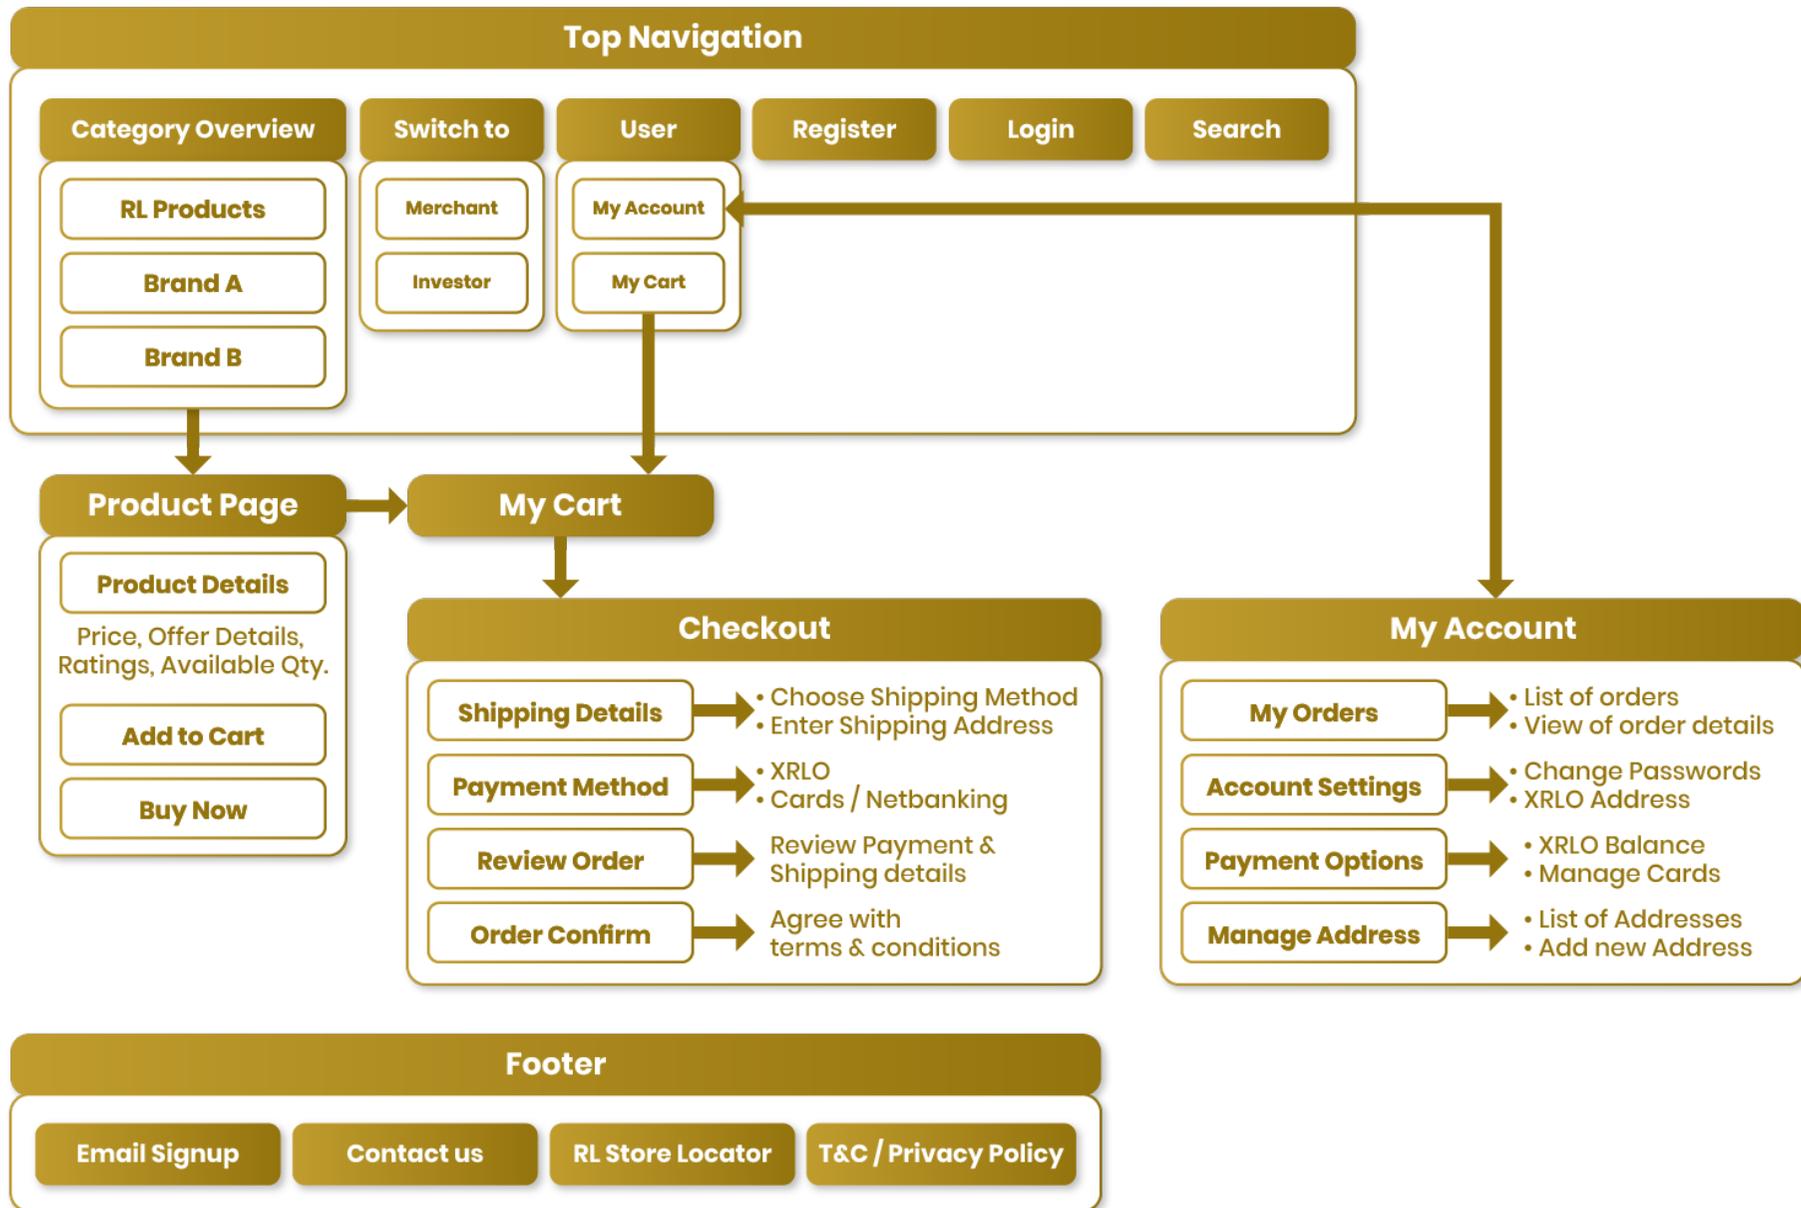

RL will be using various strategies to ensure that the company accommodates to all community members.

Reflexion® Marketplace

We are experiencing an increasing demand for Reflexion's cause-driven brand and access to the Reflexion network. Enterprises from different sectors have been approaching the Reflexion Lounge to promote and showcase their products and services. This brought us to digitize and ease the process to all our community members by scaling our business into the e-commerce marketplace. We are developing a blockchain-enabled and online marketplace which will allow XRLO Token holders to sell their own products including, but not limited to RL branded products.

The use of our blockchain marketplace will make payments on the platform transparent, anonymous and secure. Meanwhile, reducing transaction costs and simplifying the purchasing process. Decentralization, globalization, and the opportunities provided by the use of cryptocurrency in the network are a great competitive advantage over other companies that have similar solutions on the market. Our marketplace will have strict quality criteria, to only showcase and promote quality products that benefit the wider community.

For e-commerce, blockchain provides an alternative payment method through the use of XRLO Token. It also offers faster transactions by eliminating third-parties. Transaction speeds can only be limited by the speed of the network and the speed at which new blocks can be generated. With this blockchain technology introduced into the hospitality industry by Reflexion comes a more trusted payment system, transparent exchange of value with anonymous transactions. This is because blockchain based currencies do not expose identifiable information. According to "THE INDEPENDENT", card and account fraud in the UK jumped almost 40% in 2018. With the XRLO Token, customers and users will not expose sensitive data as is the case with the credit card number.

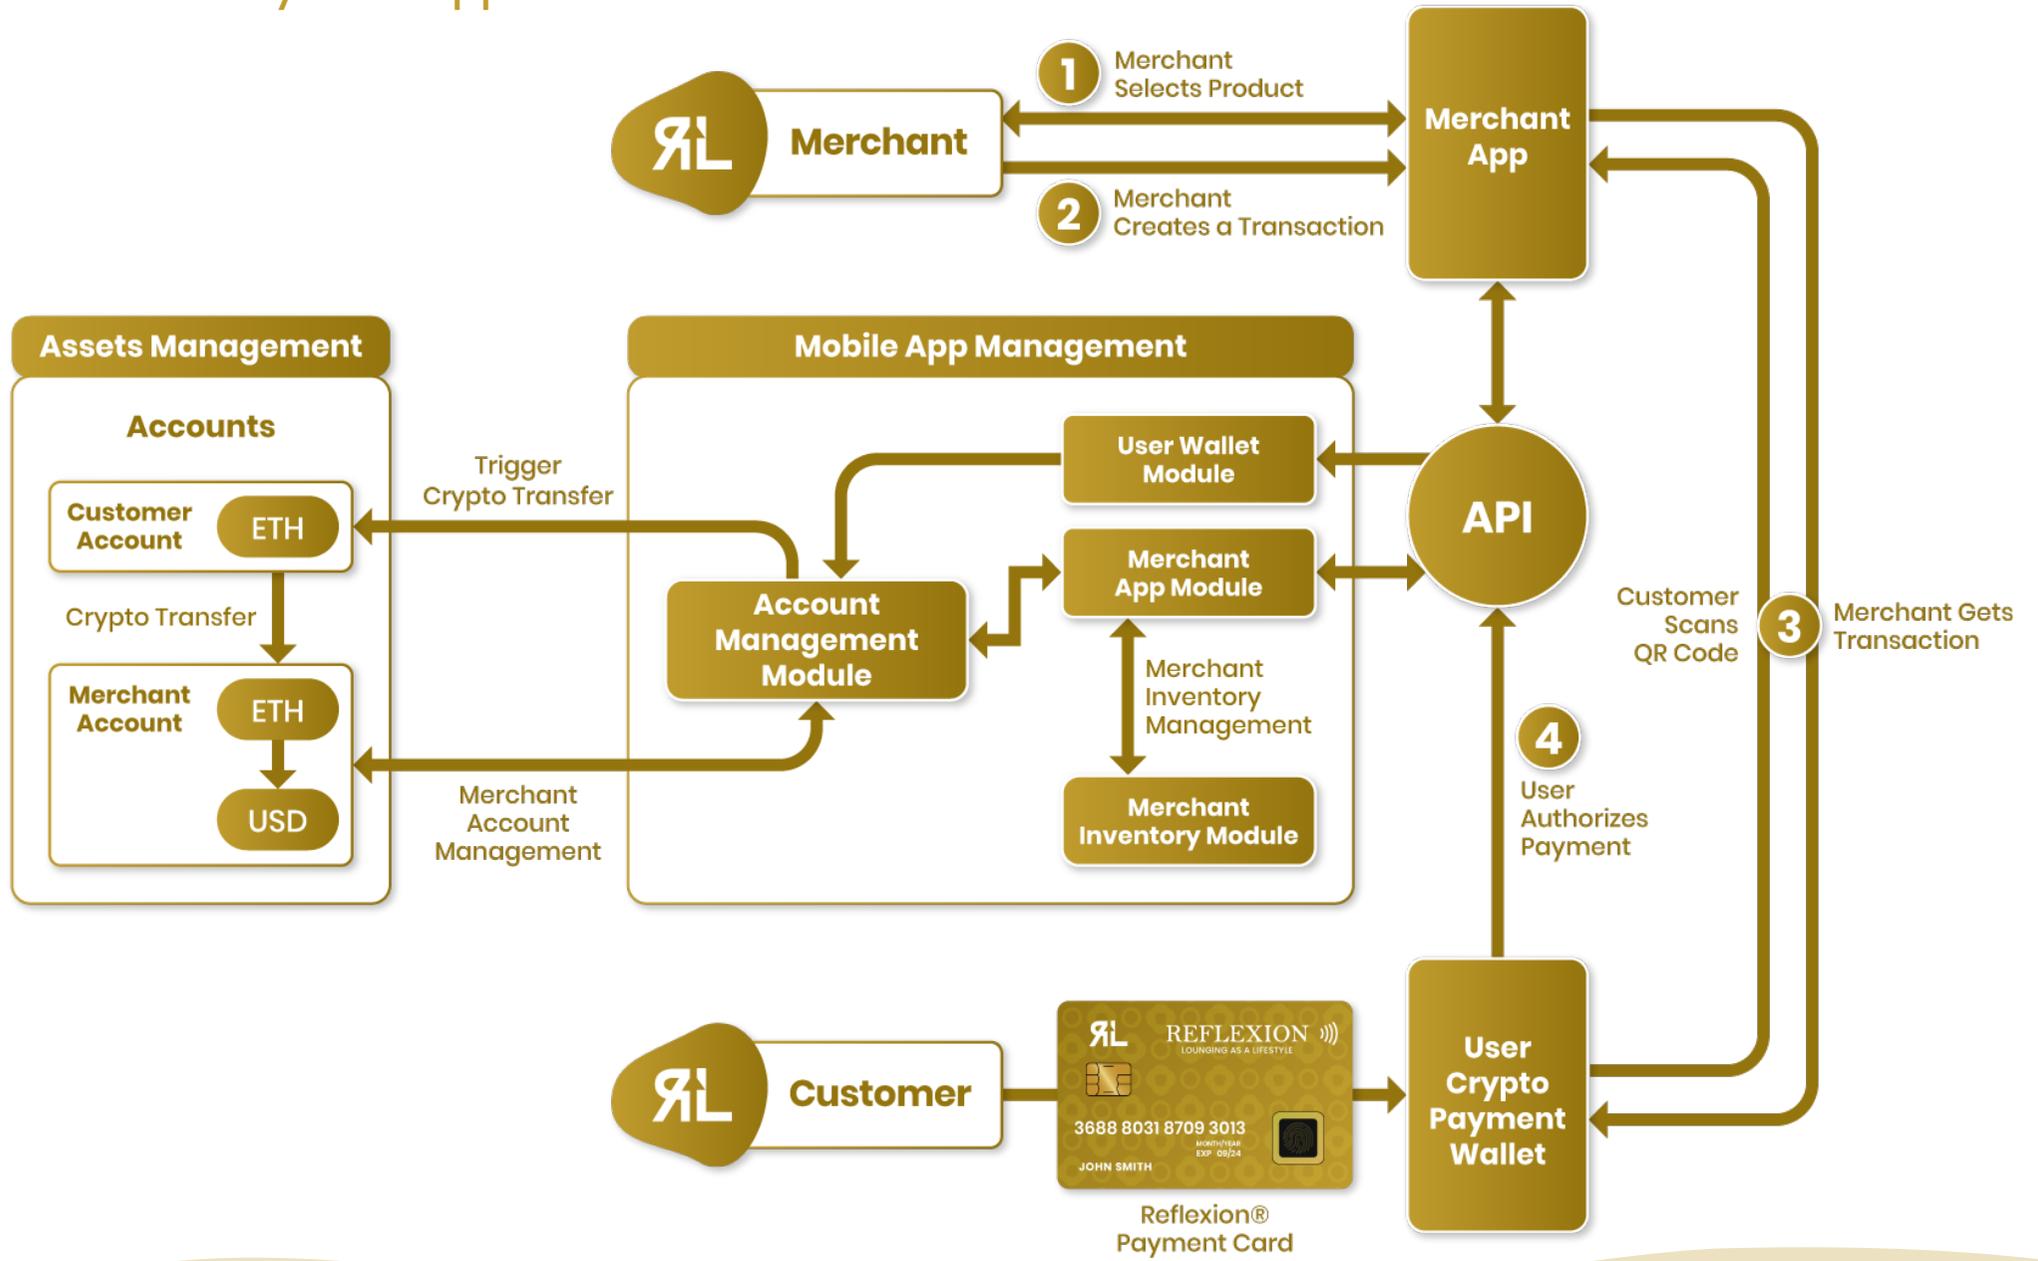

Reflexion® Token | A multi-currency remittance solution

While Reflexion Lounge is expanding territories, the management identified that remittance challenges are some of the main challenges that the expansion plan would help solve. Measures by the RL team are put in place to bridge the barrier in multi-currency adoption through XRLO Token development, token infrastructure and cross-border solutions.

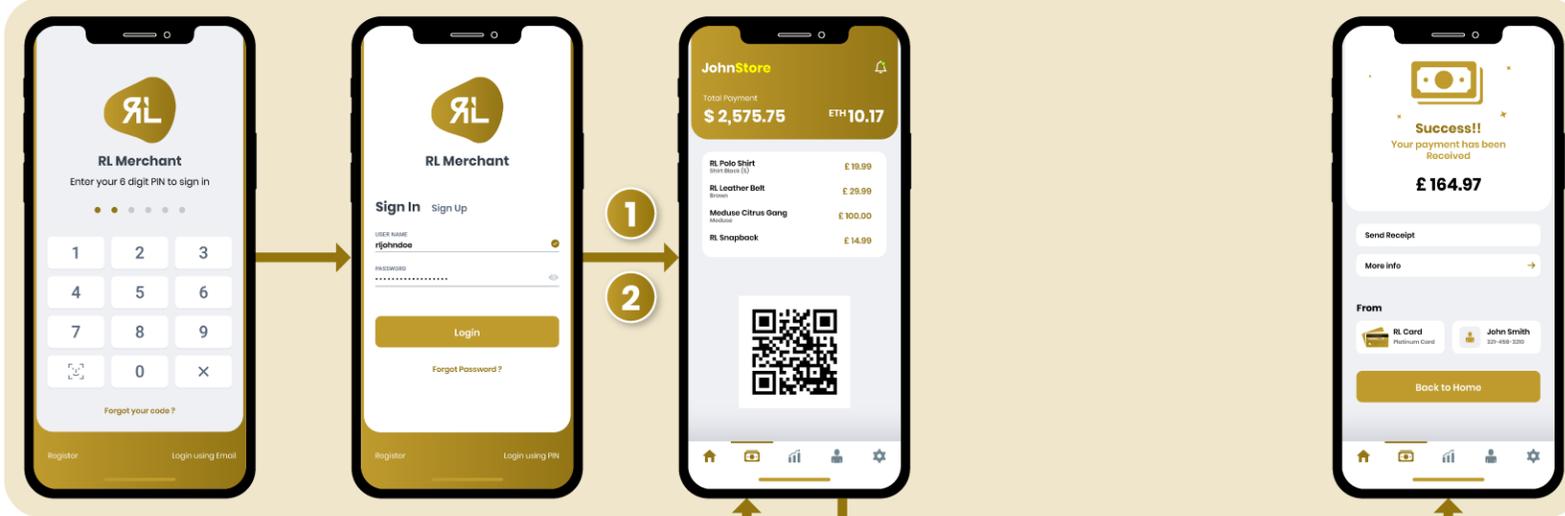

The above stated will permit all class and location of users to access and participate in the Reflexion Franchise Network®, to order products and services all the while reforming community into a globally connected anonymous society.

The utility token that will be introduced by Reflexion is going to serve as a unit of value to self-govern its business model and empower its users to interact with its product and services, while at the same time facilitating the distribution and sharing of rewards and benefits to all of its stakeholders. The utility token created by Reflexion will be an atomic unit of value inside our business ecosystem. Therefore, it creates a transactional economy between buyers and sellers. It also comes with features that allow users to earn rewards and access to services that are internal to the Reflexion business ecosystem. Blockchain technology and cryptocurrency are impacting businesses in ways that show a great prospect in the future. As a public ledger, blockchain technology validates and records all transactions in real time making it a reliable and secure system. The use of smart contracts for almost any sector of the economy, ranging from finance to health and entertainment, restaurants, lounges, etc. creates a self-governing trust-protocol. Regarding payment processing and currency, blockchain does not require a third-party or central authority for making peer-to-peer transactions. With the plan to venture into eCommerce and expand the Reflexion Lounge global presence, blockchain will serve as an effective business-model enabler.

Customer Application

Reflexion® Franchise Network

Participants in the XRLO token sale are entitled to contribute in stakes for the development of our franchise network, such that each XRLO Token holder is eligible to opt-in for franchise rights of our expanding restaurant and lounge network. XRLO Token holders are encouraged to participate using the XRLO Token®.

According to Blockchain Council, “franchise is a type of license that a party acquires to allow them to have access to a business’s proprietary knowledge, processes, trademarks, to allow the party to sell a product or service under the business name”. This implies that our community members can now be franchisees to Reflexion Lounge products and services.

However, Reflexion is not done at revolutionizing the retailing marketplace as it is employing blockchain to achieve the following:

Tokenizing Franchise Rights

Reflexion Lounge is using to blackmail to establish the process of tokenizing the franchising business model. The tokenization feature is one of the measures taken to franchise Reflexion Lounge product and services completely.

Tokenization is a distinctive characteristic of the blockchain that enables the conversion of the right of real-world assets into digital token usually to inject liquidity. In this case, it is the rights to a Reflexion Lounge franchise that is now represented by a digital token; the XRLO Token.

The Reflexion utility token enables the franchisee to deposit entry fee in tokens in their wallet and still have the opportunity to recover the amount once the franchise agreement has ended.

Reflexion Lounge Franchisees and XRLO token holders will have direct royalty participation the Reflexion Lounge (subject to terms and conditions of the Reflexion Lounge Franchisee Agreement). Upon opting-in for a Reflexion Lounge Franchise, XRLO token holders can receive monthly royalties in the form of cryptocurrency in ETH via AirDrops. The following provides a brief on eligibility of franchise rights:

- **Non-Exclusive Unit Franchisee Rights:** a minimum of 150,000 XRLO tokens must be available in the token holder’s wallet at any given time to be eligible to exercise their rights to a single unit Reflexion Lounge franchise.

- **Exclusive Territory Franchisee Rights:** a minimum of 1,000,000 XRLO tokens must be held in the token holder's wallet at any given time to be eligible to exercise their rights to territory-wide franchisee rights. However, every new unit they decide to open will require an additional 150,000 XRLO to be held in their respective wallet for as long as their units are in operation.

This guarantees to the franchisee that the franchisor will not establish another business, either itself or grant rights to a third-party, in the exclusive zone as defined by the franchisor. Holders of this right will have exclusivity in their respective zone to be the only operator of Reflexion Lounge in their territory. Territories are provided based on a certain geographical area, often a particular suburb.

- **Exclusive Master Franchisee Rights:** a minimum of 3,000,000 XRLO tokens must be held in the token holder's wallet at any given time to be eligible to exercise their rights to exclusive master-franchisee rights in their given territory. However, every new unit will require an additional 150,000 XRLO to be held in their respective wallet for as long as their units are in operation.

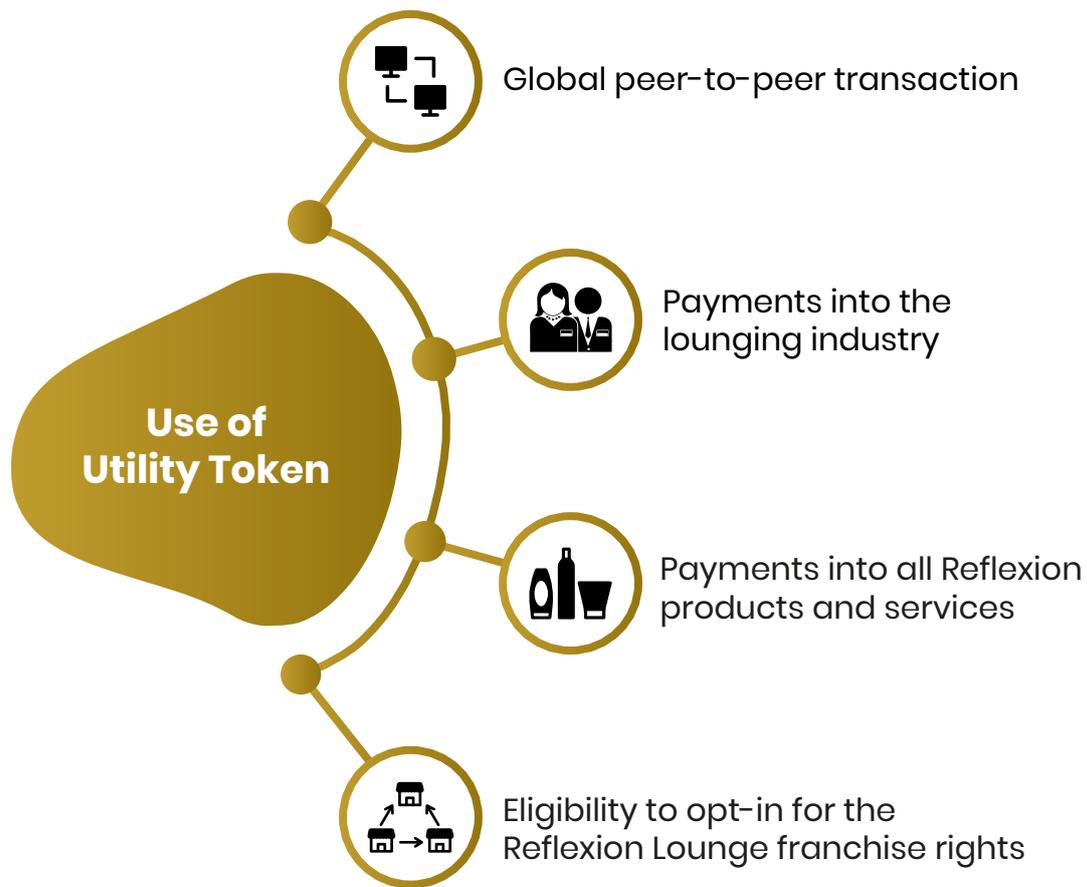

Master franchising is a form of the franchisor-franchisee relationship in which the master franchisee essentially becomes a mini-franchisor for a specified territory. The master franchisee will agree to a development schedule, which can include owning and operating their own units and/or sub-franchising units to sub-franchisees within their territories allowing the master franchisee to participate in and earn from the royalties collected from each of those units.

- **Hands-off Franchise Rights:** In all cases mentioned above, the franchisees have an option to opt-in for hands-off management by appointing an operator that is certified by Reflexion Lounge to operate Reflexion Lounge units. In this case Reflexion Lounge's operations and management company will take the full responsibility of managing the units and share the unit earnings with the franchisee as percentage of revenue.

Hands-Off Franchise Rights can be applicable on new units or existing units that Reflexion Lounge fully owns and operates.

Smart AirDrops – Community Outreach and Rewards

XRLO token holders will earn rewards in the form of XRLO tokens for their active positive participation within the Reflexion community. With Smart AirDrops we will allow members to be rewarded with XRLO tokens. Smart AirDrop involves the offering of tokens to the crypto community to help drive popularity and awareness in exchange for predefined tasks.

Market Overview

In the United Kingdom, food service is the fourth leading consumer market. It is just behind food retail, automobile, and clothing & footwear. This tells you that the foodservice market is enormous and turns in enormous profits for investors. Dine-out is one of the everyday habits of consumers in the UK, but the number of times and the place they chose to eat is dependent on the amount of money they are willing to spend then. In 2018 alone, the value of consumer food services reached a staggering amount of 80 billion Euros. The fun part is that this amount is expected to increase in 2020 to 85 billion Euros. Currently, the foodservice industry in the UK is worth over 57 billion pounds. The industry is not just fragmented; it is also a complex business environment that meets hugely varied consumers. It ranges from beautiful dining restaurants to street food stalls and even institutional dining in hospitals and schools. In today's foodservice industry in the UK, professionals are faced with diverse consumer demands depending on the environment they are operating.

In 2018 alone, the value of **consumer food services** reached a staggering amount of **80 billion Euros**

Global foodservice business

The global food service business is a hugely vast one with lots of players in it. With the current expansion plan that the Reflexion Lounge management team is working on, RL will soon become a global business establishment. The global foodservice market is divided into different segments which include Conventional Foodservice System, Centralized Foodservice System, Ready-Prepared Foodservice System, and Assembly service Foodservice System. To give you a tip of the iceberg on the profit potential of the foodservice industry; the USDA said that the foodservice and food retailing business supplied approximately US\$ 1.24 trillion in 2010 alone. When you put into consideration that from 2010 till now is nine years, and the population is on the rise, then you can understand the enormous profit potential that abound in the foodservice industry. Furthermore, the global healthy eating trend is also making the global foodservice market to offer healthy choices to conscious consumers.

In 2018 alone, the value of **consumer food services** reached a staggering amount of **80 billion Euros**

According to Euromonitor, the global foodservice industry revenues will rise to \$3.8 trillion by the end of 2019. The industry has a Compound Annual Growth Rate (CAGR) of 6.8% which shows that there are lots of activities and economic growth in this industry. Currently, the average population increase is estimated at 82 million people per year.

Blockchain, Cryptocurrency & E-Commerce

There is no doubt that blockchain has long been associated with cryptocurrency transactions, but its potential is now recognized by other industries of which e-commerce is one of them. There is no doubt e-commerce has evolved over the years but the industry still faces several challenges and blockchain has the potential to alleviate these challenges. Transactions through blockchain occur directly between customers and service providers without any need for hefty transaction cost. In 2017 alone, shoppers used Bitcoin (a cryptocurrency) for an average of USD190.2 million per month and an increase of 2,000% since 2013. As these cryptocurrencies become more commonplace, you should expect that the e-commerce industry will be taken over by these blockchain-enabled payments.

Use of Blockchain in E-commerce

For the promotion of **Faster & Cheaper transactions**

Easier Access to receipts & warrants

It ensures **Right & Legitimate** reviews

The **Security** of Data

It provides a **Clear & Direct** track of supply chains

The Market Opportunities

As stated above, opportunities abound in the restaurant, e-commerce and lounge market space. With the current global trend in the industry, two major things are shaping the various industry. These trends include:

Reflexion Lounge is building a unique and peculiar mind shifting climate With the integration of a borderless payment mechanism

Technology

As it stands today, there is virtually no market, business, or industry that hasn't been positively impacted by technology. It is the result of this trend that Reflexion Lounge team is working on introducing a digital currency through the use of blockchain technology. Cryptocurrency and blockchain technology have been on the media for the past 5 years, and it has been disrupting the way and manner of doing business.

Societal Shift – Socially Conscious Generation

Reflexion Lounge is building a unique and peculiar mind shifting climate in the bid to creating a healthier, happier, and more sober lifestyle. By having the Waterpipe Lounge and non-alcoholic brand, Reflexion Lounge is best positioned to reap the benefits of the societal shift away from alcoholic drinks towards a more sober lifestyle. We are working on building and creating a community where trust and unity will prevail and abound. Blockchain technology is currently assuming the role of trusted gatekeeper and purveyor of transparency to allow community members to transact anything of value. In the emerging "trust economy" that blockchain technology has introduced, lies the foundation on which Reflexion Lounge is building its business community to impact future generations. The blockchain integration enables a virtual economy of shared values, equality, and instant sharing of value in peer-to-peer transactions.

Crypto-economic Payment Integration

Just as stated earlier, Reflexion Lounge is working on the use of blockchain technology to introduce token payment into the wider restaurant and lounge industry. With our expansion plan, the use of a cryptocurrency and digital tokens for the payments of services provided by Reflexion Lounge is a step towards convenience, trust, transparency with anonymity. Cryptocurrency will help our business to solve currency barriers as we look forward to becoming a global brand in the restaurant and Lounge industry. It is not always easy for someone in a different country to pay for goods and services in foreign currency to service providers in another country. Some of the currency barriers that our token introduction will solve include

- Strict regulations,
- Exchange rate conversion processes,
- Middlemen activities,
- High transaction costs, and
- Chargebacks.

At Reflexion,
we believe that
Cryptocurrency will **help our
already-existing business** to
solve currency barriers as we
look forward to becoming a
**global brand in
the Restaurant &
Lounge industry**

Blockchain Enabled Franchising

In fact, from the world of art to the thrill dripping round leather game of football and basketball, blockchain continues to make its way into virtually all facets of the business world. According to Ed Teixeira, the Chief Operating Officer of Franchise Grade, a franchise research firm in New York; the next port of call for the application of blockchain is franchising. It is currently “visible to the blind” that blockchain application has gone beyond cryptocurrency transactions. Just like what is seen in the FOODCOIN Ecosystems, a global marketplace for food and agricultural products that are designed to eliminate intermediaries through the use of smart contracts. This is what Reflexion Lounge will do with blockchain in our franchise business model. Also like what you see in the U.S retailer Walmart Inc., using blockchain they introduced a system that allows for traceability and food safety. Europe’s fastest growing energy provider Restart Energy initiated the first blockchain franchise called RED-P. Using blockchain technology, Reflexion will create utility tokens which will give investors and entrepreneurs access to trade on our platform. There will be a minimum amount of these utility tokens that an investor or Reflexion community member will own, and he/she will be given an exclusive right to own sub-franchises within his/her country of residence.

Token Economics

Through your participation in our XRLO Token sale, you have the opportunity to support the Reflexion brand and to help revolutionize the restaurant and lounge market worldwide.

With the aim of **going global in mind**, the Reflexion Team will be giving out to community members who own a specified minimum amount of XRLO **an exclusive rights to Reflexion sub-franchise** to operate within his/her country of residence

The XRLO Token is deployed on the Ethereum network and will comply with the ERC-20 standard and it plays the central role in the Reflexion network.

Unsold tokens from the private and the presale go into the main sale. All unsold tokens will be burned.

Token Details

Name	XRLO Token
Decimal	8
Ticker	XRLO
Smart Contract	ERC20
Total Supply	200,000,000
Platform	Ethereum
Token Purchase Via	Ethereum [ETH]
Supported Wallet	ERC20 Wallets [myetherwallet, trustwallet, imtoken]
Soft-cap	5,000 ETH
Hard-cap	72,000 ETH
XRLO Token Website	www.ReflexionToken.io

Token Sale Events

The Token Sale will take place in several rounds to provide an incentive to early adopters of our XRLO token and Reflexion network. The token sale will take place on www.reflexiontoken.io

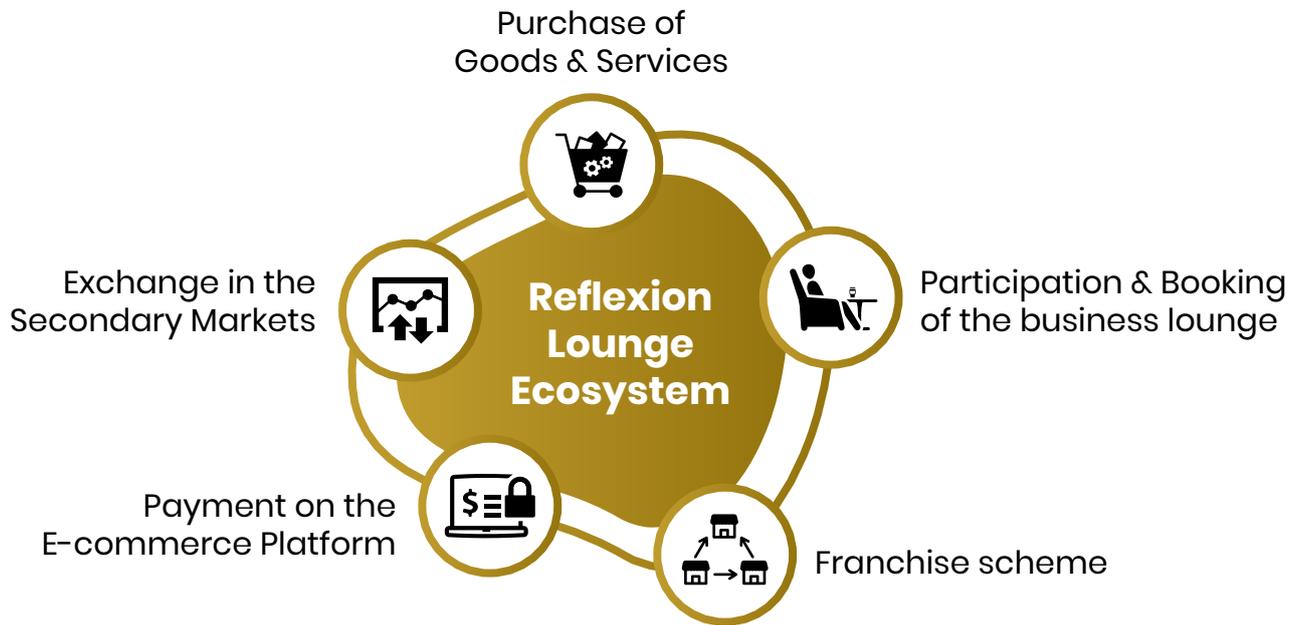

Tokens Generated	200,000,000 XRLO		
Token Sale Events	*Private-Sale	**Pre-Sale	***Public-Sale (ICO)
Tokens Offered	10,000,000 XRLO	20,000,000 XRLO	60,000,000 XRLO
Token Price	0.0003 ETH	0.0006 ETH	0.001 ETH
Hard Cap	3,000 ETH	12,000 ETH	57,000 ETH
Soft Cap	5,000 ETH		

***Private-Sale** will provide the current and existing Reflexion Lounge community access to XRLO tokens before they hit the wider audience and cryptocurrency exchanges.

****Pre-Sale (or IEO)** will take place either on the XRLO Token website or on a third-party cryptocurrency exchange which offers Initial Exchange Offering (IEO), which allows the existing users of that exchange to participate in token offerings before they become accessible to the wider public.

*****Public-Sale (ICO)** will take place on various cryptocurrency exchanges where XRLO token will be listed and traded by cryptocurrency enthusiasts and people who wish to become part of the member of the Reflexion community.

Use of Token

Token Distribution

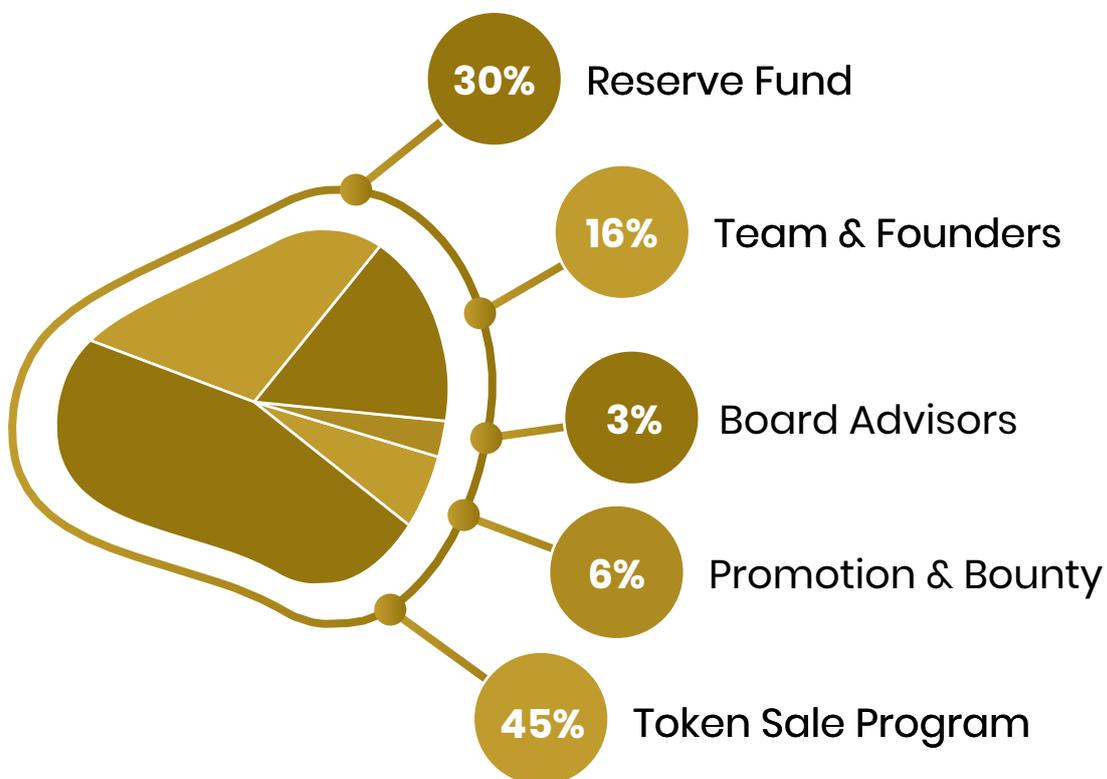

Token Sale Program: 45% (bonus ratio inclusive) of the Tokens will be allocated for the Token Sale and will be distributed to the Community.

Reserve Fund: 30% of the Tokens will be earmarked for the Reserve and will gradually be used for project development, and this will be locked for 1 year after token sale.

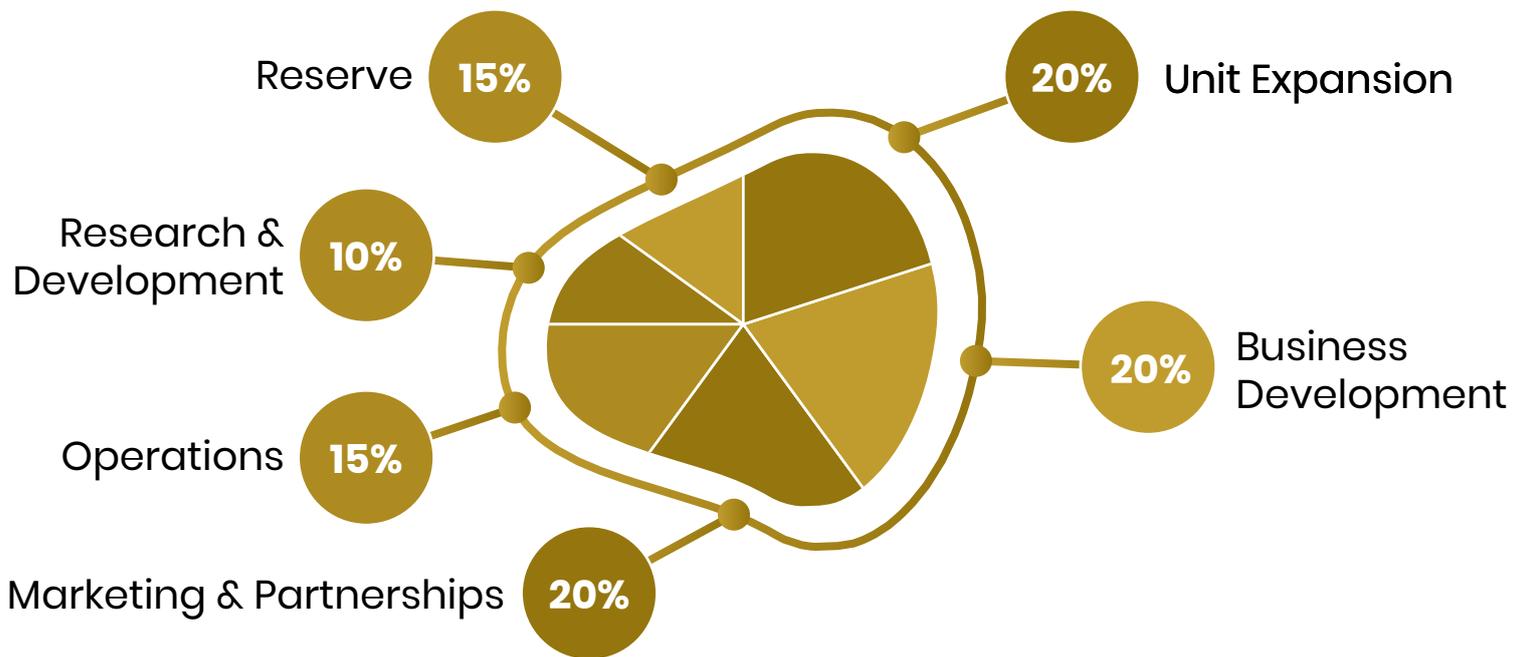

Team & Founder: 16% of the Tokens will be allocated to Founders and the core Team Members, and this will be locked for 6 months after token sale.

Board Advisors: 3% of the Tokens are allocated to our Board Advisors, and this will be locked for 6 months after token sale.

Promotion & Bounty: 4% of the Tokens will be allocated to promotion expenses and strategic partnership during token sale and after full launch, and 2% of the Tokens will be allocated for the Bounty Campaign as rewards for Bounty participants, miscellaneous costs associated with the token sale, airdrop campaign expenses, and referral program payouts [if any].

Use of Proceeds from ICO

Reflexion Team will be deploying **varieties of communication tools** common to companies with a distributed global presence. While making sure we have our best people, **in the right places, at the right time.**

Unit Expansion – 20%

Reflexion Lounge will dedicate 20% of the Hard Cap raised to expand its Reflexion Lounge presence and operational units in different countries and cities around the world, starting with one lounge in each of the following places:

- United Arab Emirate (i.e. Dubai, Abu Dhabi)
- Canada (i.e. Montreal, Toronto)

These units will be company owned units which will allow the Reflexion Lounge brand to widen globalize its presence, showcase and provide pilot units for prospective franchisees in these cities and their surrounding territories.

Business Development – 20%

Organization and maintenance of the infrastructure for collecting, processing and delivering visitor statistics between all platform and as a global company with staff and customers to be based in multiple countries, we will use many communication tools common to companies with a distributed global presence. However, we also recognize that sometimes there's no substitute for having our people on-ground and in-person. A portion of funds will be allocated to making sure we have our best people, in the right places, at the right time.

Participation in professional associations to aid in gaining waves of regional pools of clients. Listing on Major exchanges, Web Servers and other IT/Technical developments.

Marketing & Partnerships – 20%

Differentiation in a crowded market requires professional marketing and sales collateral. Expenses for attracting and motivating users to the platform, motivating users to participate in the project. Establishment of partnerships with data providers and other partners. Participation and holding of professional conferences. Support for the community of token holders and traders.

Operations – 15%

Development of a back-office to support operational activities [General, Administrative, Operations], contracting, customer support and payment processing. This also includes current costs for office space rent, salaries, building the company structures and branding, pieces of equipment and other miscellaneous expenses.

Management of all business activities, hiring and maintaining of a strategic world- class professional team.

Establishment of a legal structure of the company, legal documentation for potential changes in legislation related to cryptocurrencies, legal support of ongoing operational, marketing and business development activities.

While our franchise rights **will be open to all minimum qualified hodlers of XRLO**, The Reflexion Team will still allocate **10% of all funds raised to research & development** of the global expansion of Reflexion Lounge & it's Franchisees.

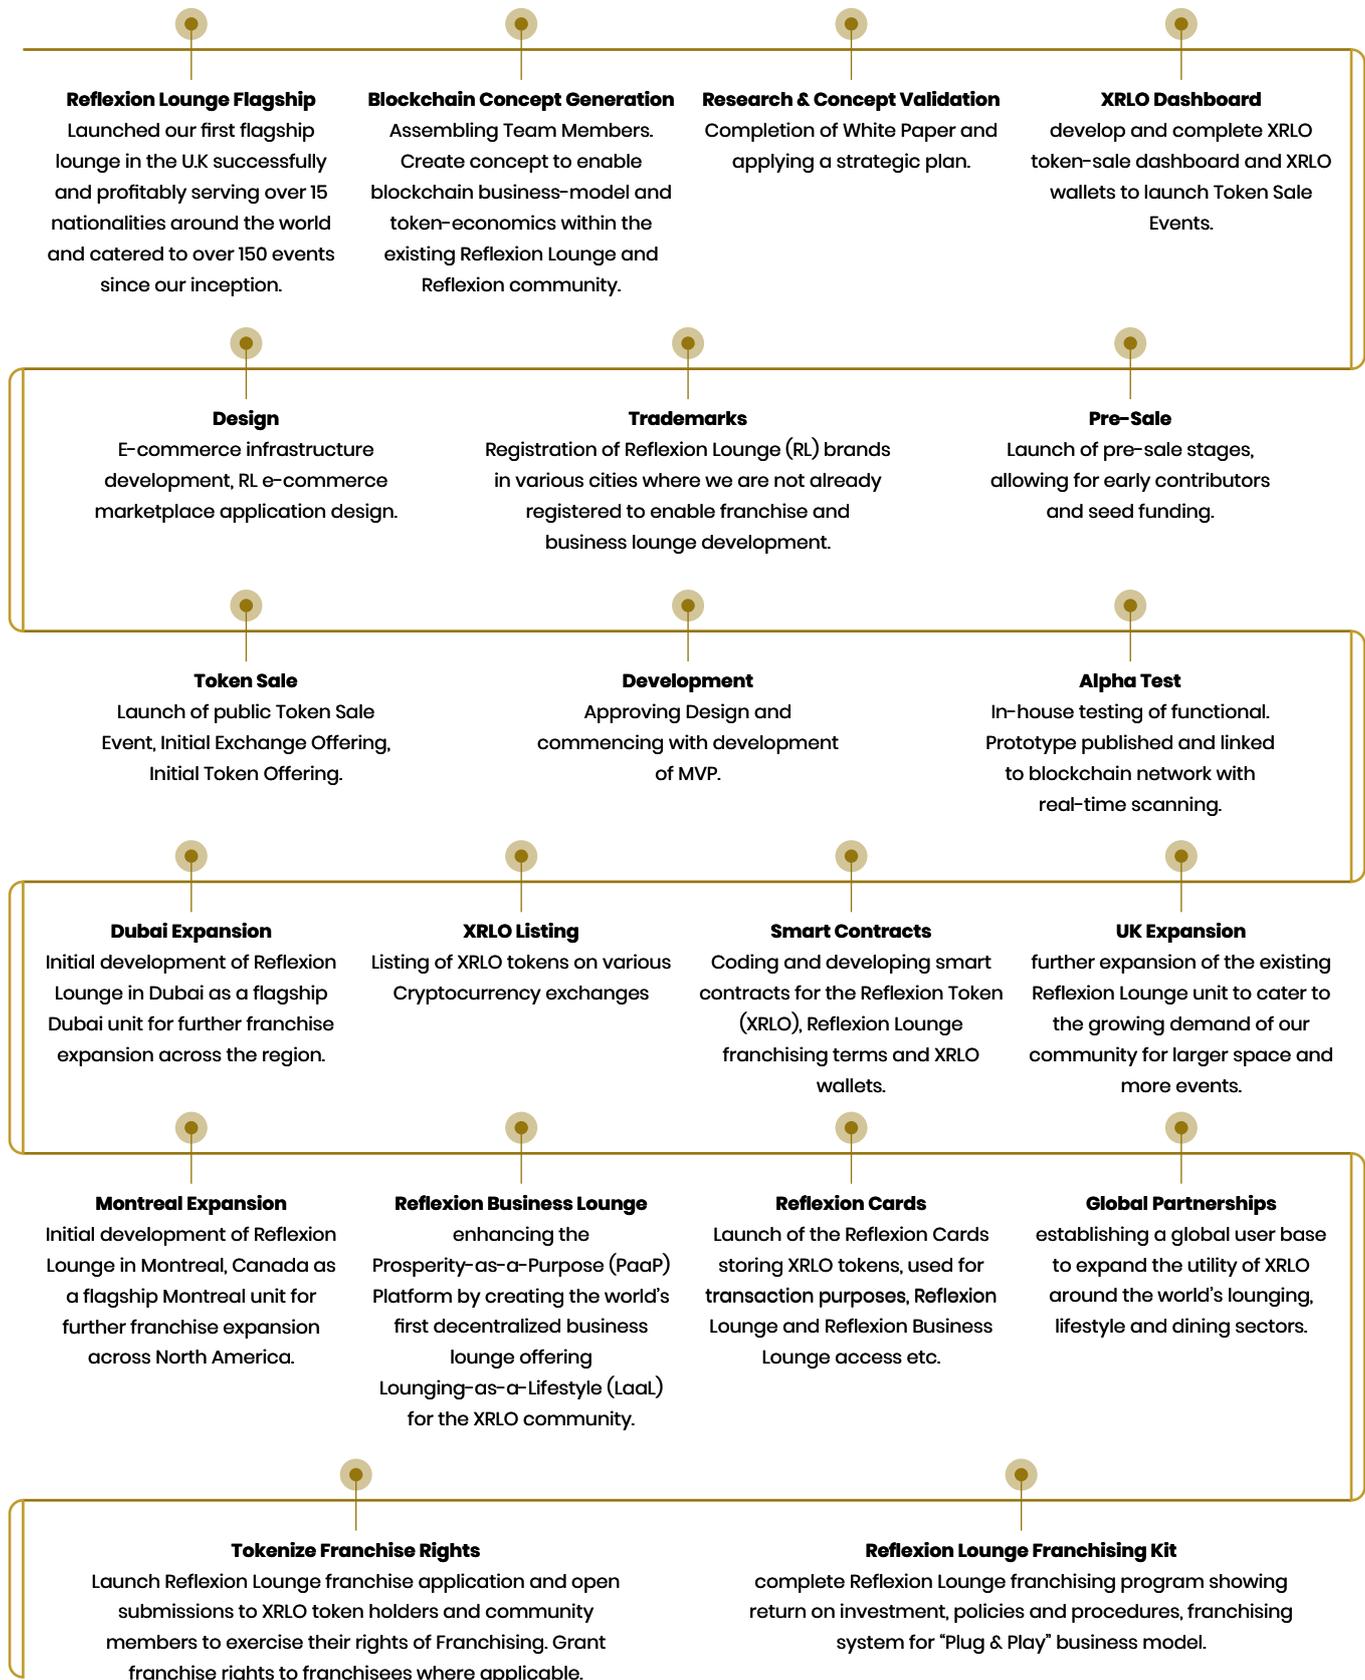

Research & Development – 10%

This is to help boost the platform and to give end users more reason to stick to using our platform. Also, to assist our franchisees and enthusiast platform.

Reserve – 15%

The above percentage of the funds will be used to invest in other businesses to generate and maximize income outside the project itself, liquidity, exchanges and other miscellaneous expenses e.g. tax.
